Everything You Need for Great Angular UI

Kendo UI for Angular delivers components to meet all app requirements for data handling, performance, UX, design,

accessibility, and so much more. Here is just some of what Kendo UI for Angular can do.

Start Demo

Get the Code

Ready-to-run project with some of our most popular Angular components.

Full Angular Components Library

Explore 110+ high-quality Angular components.

Start Free Trial

Fully supported 30-day trial of the most complete Angular UI library, themes, documentation and more.

Features

110+ Angular Components

Highly accessible, consistent and easy to use, the most comprehensive Angular components library empowers you to build stunning Angular apps in no time.

Full-featured Data Grid

Leverage our high performance Angular Data Grid including advanced data filtering, grouping, and much more.

Design Tools for Stunning UI

Build modern Angular UI with our professional built-in themes (incl. Material, Fluent and Bootstrap), [Progress ThemeBuilder](#), Figma kits and more.

Award-winning Support

Whether you are on a trial or have a license, we stand behind our components with personal support from the engineers who build the tools.

Detailed Documentation

Remove any obstacles along the way with our detailed documentation and a comprehensive library of learning resources.

Consistent API for Easy Customization

Each Angular UI component and its API are carefully crafted for quality and ease of customization.

Native Angular UI Components

Built for the Angular framework from the ground up, our Angular UI components are designed to be fast, lightweight and easy to customize.

Friendly Licensing

Leverage our user-friendly licensing to match your specific needs. Each license is perpetual and comes with one year of maintenance and support.

Industry-leading Accessibility

Our components support the latest security and accessibility standards, including WCAG 2.2 AA, Section 508 and WAI-ARIA best practices.

More Than Just an Angular Component Library

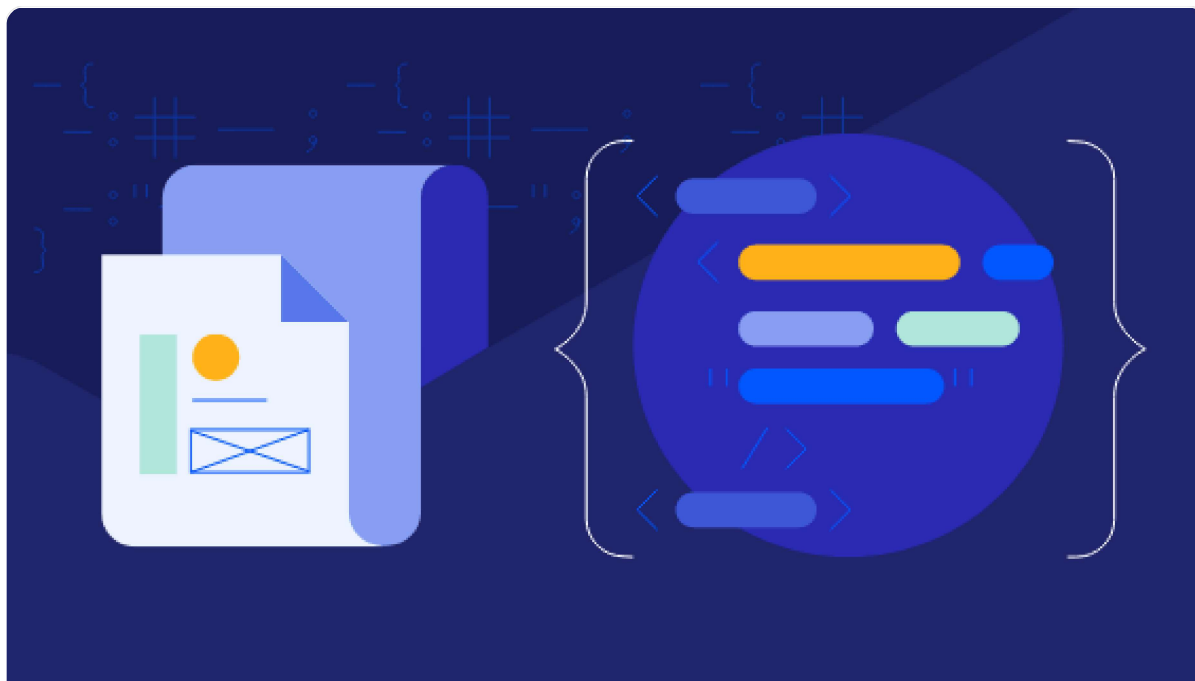

Design Tools
Simple to advanced, style your components the easy way

VS Code Extension
Create new projects and leverage advanced tools

Embedded Reporting
Complete embedded reporting for web and desktop apps

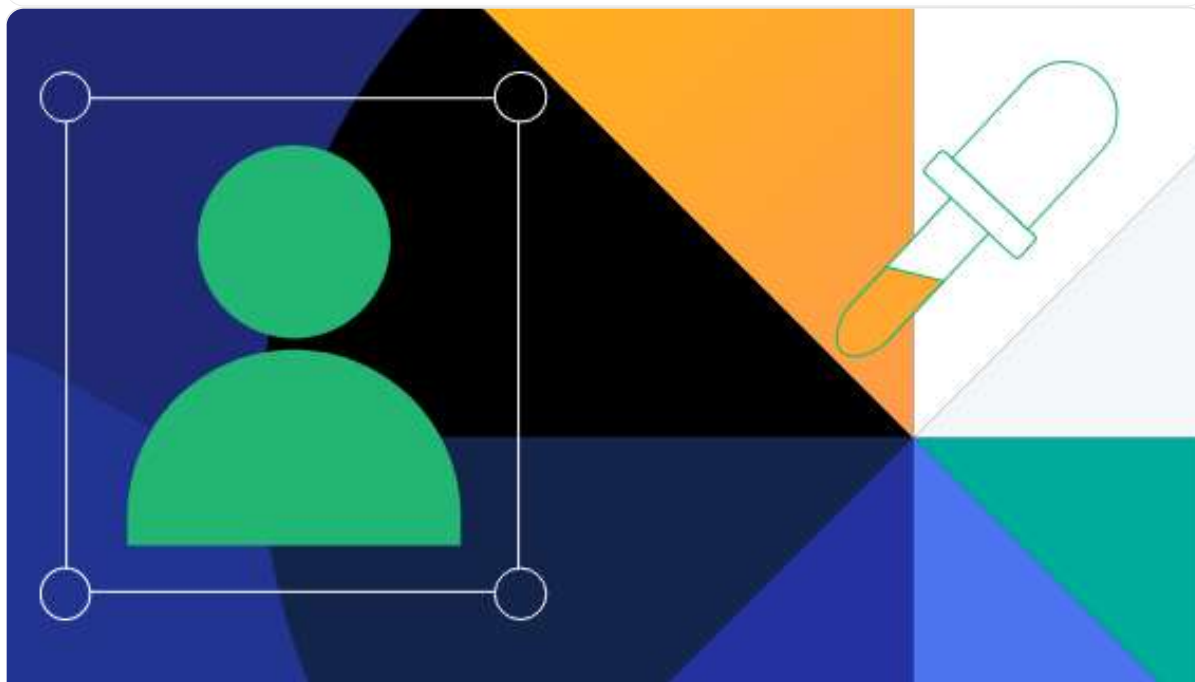

Virtual Classroom
The easiest way to get started with Angular

We combine our UI components with front-end documentation and tools into a Design System Kit to help you satisfy your styling requirements and produce consistent UI without hassle.

Front-End Documentation

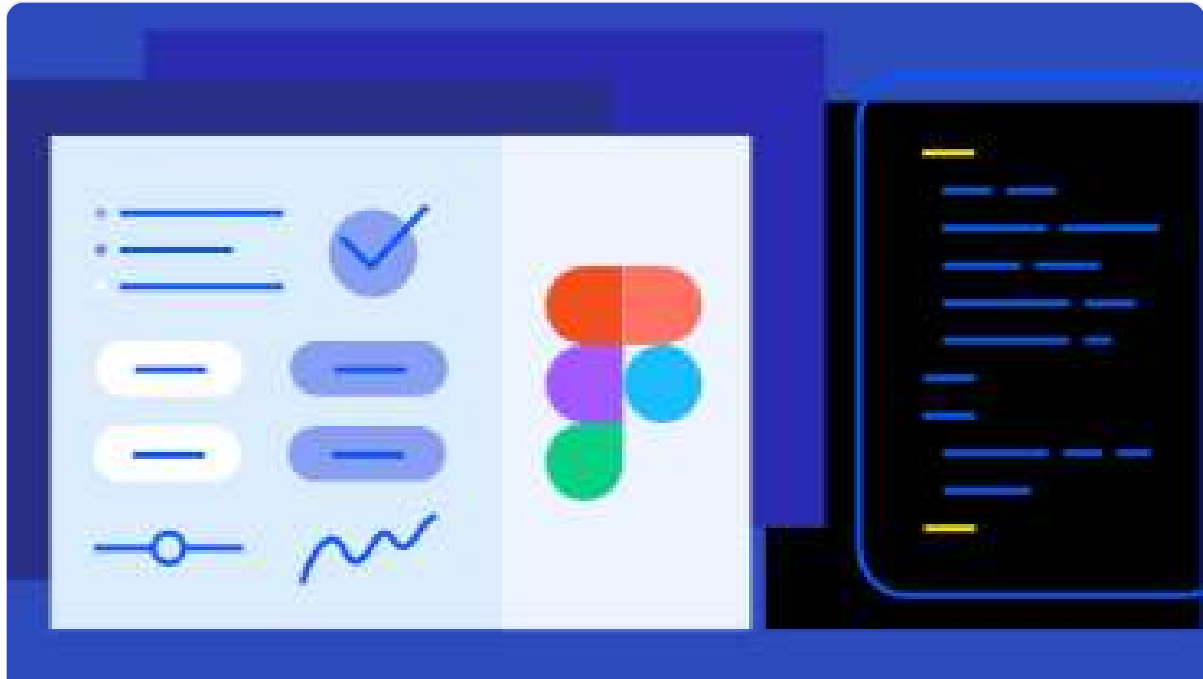

Leverage our detailed design and front-end documentation on how to make the necessary customizations to Telerik and Kendo UI themes.

ThemeBuilder

Point, click and customize its built-in themes and avoid tedious CSS. Choose between the free ThemeBuilder or subscribe to ThemeBuilder

Pro, Ultimate, or Enterprise for deeper customization options.

Figma Kits

Designers leverage our design kits to mock up design changes directly to representations of our components. These are free and will help streamline the communication between you and your design team.

Flexible Packaging Tailored to Your Needs

The Kendo UI bundle is the best option if you're focused on JavaScript development. If you work with .NET technologies or need a reporting, mocking or testing solution, the DevCraft bundle offers the most value for money—and the most power.

Buy Kendo UI Bundle

Buy Kendo UI bundle with all four component libraries built natively for jQuery, Angular, React and Vue.

What's New with Kendo UI for Angular

The screenshot displays the Kendo UI for Angular Spreadsheet component. The interface includes a ribbon with 'Home', 'Insert', and 'Data' tabs. The 'Home' tab is active, showing options for font face (Arial), font size (12), and text formatting (bold, italic, underline, text color). The spreadsheet grid shows a table with the following data:

ID	Product	Quantity	Price	Tax	Amount
216321	Calzone	1	\$12.39	\$2.48	\$14.87
546897	Margherita	2	\$8.79	\$1.52	\$21.10
456231	Polo Formaggio	1	\$13.99	\$2.80	\$16.79
455873	Greek Salad	1	\$9.49	\$1.90	\$11.39
456892	Spinach and Blue Cheese	3	\$11.49	\$6.89	\$41.36
546564	Pogoretto	1	\$10.99	\$2.20	\$13.19
789455	Creme Brulee	5	\$6.99	\$6.99	\$41.94

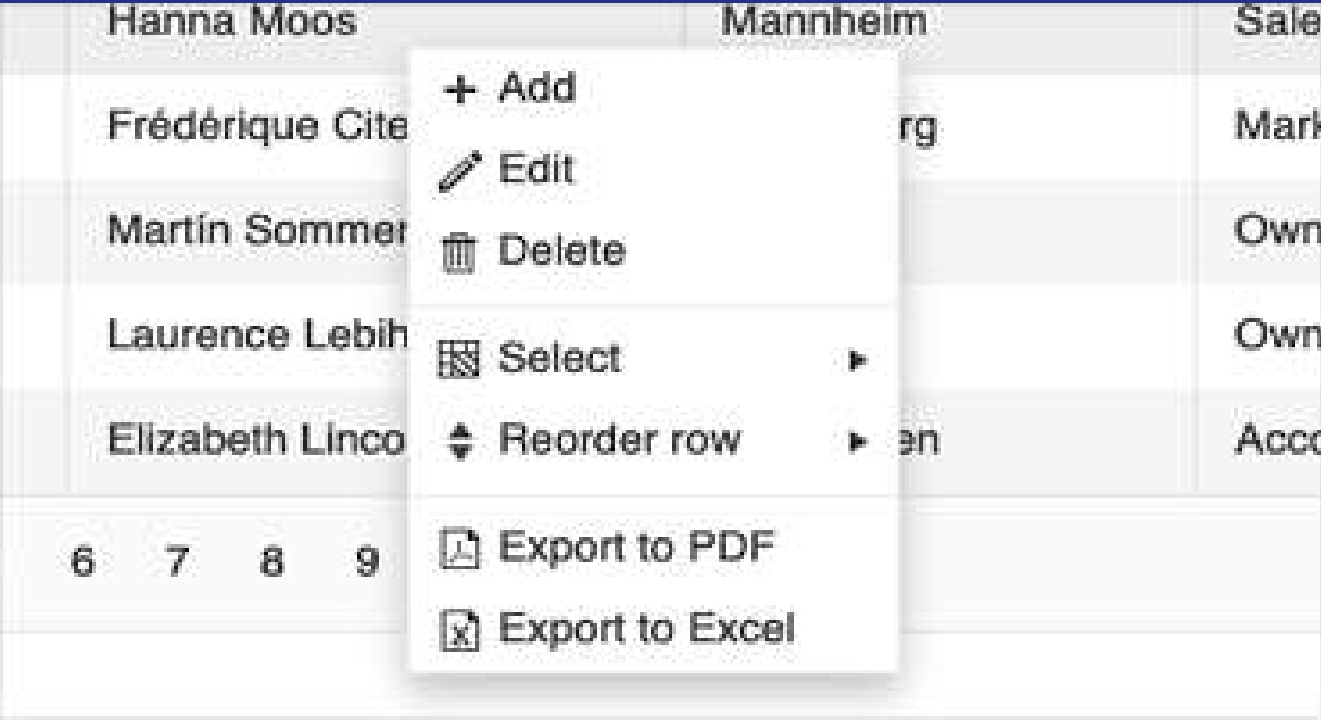

New Component: Angular Spreadsheet

The new Kendo UI for Angular Spreadsheet component enables you to bring advanced Excel-like experience to your Angular applications.

New Component: Angular Pyramid Chart

The new Angular Pyramid Chart enables you to easily visualize data within a pyramidal structure organized into horizontal segments.

Angular Grid: Context Menu

The Angular Data Grid now enables you to display a context menu within the component, providing a convenient way to apply data processing operations to specific rows.
